#### Software Developer | Bitontree Solutions

Sep 2021 – Feb 2023 | Ahmedabad, Gujarat, India

- Working with Frontend development team to design and develop robust solution to meet client requirement.
- Developed reusable and optimizing components for maximum performance.
- Discussed Issue with client and review internal team code.

### Projects

#### 1. Blitzz

Remote Visual Support Platform

##### Responsibility

- Develop reusable UI components and promoting consistency and efficiency in development.
- Utilize state management libraries such as Redux to manage application state efficiently and ensure seamless user interactions.
- Collaborate with backend developers to integrate frontend interfaces with backend APIs, ensuring data flow and functionality alignment.
- Conduct code reviews to maintain code quality, identify bugs, and suggest improvements.
- Develop and run unit tests for React components using Jest and React Testing Library to validate functionality, behaviour, and state management, covering diverse use cases and edge scenarios."

##### Technologies

Angular, React JS, Redux, Formik, Lodash, Axios

#### 2. Eqonex

Cryptocurrency Trading

##### Responsibility

- Develop reusable UI components with responsive design
- State management using Redux
- Code optimization | Server Side Rendering

##### Technologies

Nextjs, Typescript, MUI, Redux, Lodash, Day.js, Prismic, Axios

### Professional Skills

#### Programming Languages:

Javascript & Typescript

#### Library / Framework:

React, Next.js, Angular, Redux.

#### Skills:

HTML, CSS, Bootstrap, MUI, Antd & Prismic

### Education

#### Bachelor of Engineering

(BE-IT) | KITRC(GTU)

2021–Present

#### Diploma of Engineering

(DE-IT) | RC Technical(GTU)

2018–2021
